SUMMARY

Results-driven Frontend Developer with a proven track record of delivering 10+ commercial web applications, including complex CRM platforms, enterprise admin dashboards, and high-traffic e-commerce solutions within a single year. Expert in building scalable, reusable component-based architectures using React and TypeScript, with a deep focus on global state management via Redux Toolkit and RTK Query. Specialized in turning complex business requirements into high-performance, production-ready digital products with full ownership.

EDUCATION

- Master, Cyber Security**
Azerbaijan University of Architecture and Construction
09/2025 – Present | Baku
- Bachelor, Information Technology**
Azerbaijan Technical University
09/2021 – 07/2025 | Baku
- Front End Developer**
Matrix Academy
2025 | Baku
Honour Degree
- Front End Developer**
Code Academy
2025 | Baku
High Honour Degree

EXPERIENCE

- Middle Front End Developer**
TexnoCode 
05/2026 – Present | Baku
 - Leading the frontend architectural planning for upcoming scalable web products, establishing clean code patterns and modern development workflows.
 - Integrating robust application architectures using React, TypeScript, and next-gen state management to ensure long-term maintainability.
 - Collaborative engineering using AI-assisted development tools to accelerate prototyping, optimize testing, and maximize team velocity.
- Front End Developer**
Buyonida MMC
05/2025 – 05/2026 | Baku
 - Spearheaded frontend development for enterprise-grade CRM systems and multi-tenant e-commerce infrastructures, improving system reliability and data flow efficiency.
 - Designed modular state architectures using Redux Toolkit and advanced RTK Query features, reducing redundant network requests by implementing strict caching and structural endpoints.
 - Collaborated directly with product stakeholders and backend engineering teams to design clean API contracts, accelerating integration cycles and eliminating data handling bottlenecks.

SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS

State Management: Redux Toolkit, RTK Query

UI Libraries: Tailwind CSS, Ant Design, Material UI

APIs & Data: RESTful APIs, Dynamic Data Fetching, Caching Architectures, Error Handling

Architecture: Component-based Architecture, Reusable UI Design

Tools & Systems: Git, GitHub, GitLab, CI/CD, Agile Methodologies

Backend Frameworks: Node.js, MongoDB

- Developed a centralized, reusable internal UI component library (tables, secure forms, custom modals), reducing time-to-market for consecutive company products by 30%.
- Mentored junior developers and interns through structured code reviews, fostering a culture of high performance and strict adherence to modern frontend practices.

Front End Developer (Intern)

Buyonida MMC

03/2025 – 05/2025 | Baku

- Contributed to live production environments, transitioning successfully from an intensive internship to a full-time engineering role based on performance.
- Developed highly responsive layouts using HTML5, CSS3, SASS, and modern UI libraries under the guidance of senior engineers.

PROJECT

03/2025 – Present

Buyonida – E-commerce Platform, <https://buyonida.com/> 
Buyonida MMC

- Developed a scalable e-commerce platform allowing users to create and manage their own online stores.
- Designed frontend architecture using React with a focus on modular and reusable components.
- Integrated RESTful APIs and managed server state using Redux Toolkit and RTK Query.
- Implemented dynamic product management, user flows, and admin-side features.
- Ensured responsive design, performance optimization, and cross-browser compatibility.

05/2026 – 05/2026

Texnocode – Company Portfolio Website, <https://texnocode.com/> 
TexnoCode MMC

- Developed and optimized the official company portfolio website using React, ensuring a modern and highly responsive user experience.
- Implemented multi-language support (\$i18n\$) for seamless localization and dynamic content rendering across different regions.
- Engineered a custom theme engine featuring dynamic dark/light mode toggles (including a dedicated dark rider aesthetic) to enhance UI accessibility and user engagement.
- Managed global state and asynchronous data fetching efficiently using Redux Toolkit and RTK Query to ensure smooth performance.
- Integrated robust REST APIs for dynamic data management, service listings, and portfolio tracking.
- Designed modular, reusable component architecture to maintain scalable and clean code practices.

02/2026 – 03/2026

Mezuro – E-commerce Platform, <https://mezuro.az/> 
Buyonida MMC

- Developed a high-performance e-commerce platform designed to streamline the product discovery and purchasing process.

- Built a scalable and reusable component-based architecture using React, including product grids, advanced filtration panels, and shopping cart modules.
- Integrated RESTful APIs to handle dynamic product listing, search functionality, and category-based filtering.
- Managed global state and server-side caching using Redux Toolkit and RTK Query to ensure a seamless and fast user experience.
- Implemented a fully responsive UI using Tailwind CSS, optimizing the layout for mobile, tablet, and desktop environments.
- Handled complex form validations and user profile management, ensuring data reliability and secure checkout flows.

08/2025 – 09/2025

Kliniken Allianz – Medical Tourism Platform ,
<https://kliniken-allianz.com/>

Buyonida MMC

- Developed a medical tourism platform connecting international patients with healthcare providers.
- Implemented dynamic content rendering via REST API integration.
- Designed reusable UI components to support future feature expansion.
- Ensured responsive layouts and optimized performance across devices.

03/2026 – 04/2026

Technobox – E-commerce Platform, <https://technobox.az/>

Buyonida MMC

- Developed a comprehensive e-commerce solution specializing in technology and electronics, featuring a dynamic product catalog and user-friendly interface.
- Engineered a modular frontend architecture using React to facilitate reusable UI components like product sliders, technical specification tables, and interactive filters.
- Leveraged RTK Query and Redux Toolkit for efficient server-state management, ensuring real-time updates for stock availability and price changes.
- Integrated complex RESTful APIs to manage high-volume product data, user authentication, and seamless checkout transitions.
- Optimized web performance and SEO-friendly structures to enhance visibility and ensure rapid page load times across all devices.
- Utilized Tailwind CSS to deliver a sleek, modern "Tech" aesthetic with a mobile-first responsive design.

04/2025 – 04/2025

SSS Construction – Company Portfolio Website , <https://sss-tel.az/>

Buyonida MMC

- Built a portfolio website to showcase construction and renovation projects.
- Developed responsive layouts with modern CSS techniques.
- Ensured clean UI structure and maintainable component design.

05/2025 – 05/2025

Victory College – Educational Institution Website ,
<https://victory-college-eight.vercel.app/>

Buyonida MMC

- Developed a presentation website for an educational institution.
- Implemented structured layouts and reusable components using React.
- Optimized UI for performance and responsiveness.

06/2025 – 07/2025

Natavan Menu – Restaurant Menu Application

Buyonida MMC

- Developed a tablet-focused digital menu application for restaurant customers.

- Designed responsive UI adaptable for both tablet and desktop environments.
- Implemented clean component structure to ensure easy content updates.

07/2025 – 08/2025

Premier CRM – Supply & Order Management System ,
<https://crm-premier.com/>

Buyonida MMC

- Developed a multi-role CRM system for employees, suppliers, and administrators.
- Implemented role-based UI logic and access control on the frontend.
- Built order creation, tracking, and delivery workflows aligned with business rules.
- Collaborated with backend developers to ensure consistency between frontend logic and API behavior.

08/2025 – 09/2025

TonuBy CRM – Financial & Admin Management System

Buyonida MMC

- Built an internal CRM system for managing cash flow, debt tracking, and financial operations.
- Designed global state structure and asynchronous data handling using Redux Toolkit and RTK Query.
- Developed reusable table components with filtering, pagination, and sorting capabilities.
- Handled API error states, loading scenarios, and edge cases to ensure data reliability.

05/2025 – 06/2025

Asterias – Educational Services Platform

Buyonida MMC

- Developed a corporate website presenting educational services and programs.
- Built reusable UI sections using React for scalability.
- Ensured responsive design and cross-browser compatibility.
